energy conversion lab skku - rational design of metallic functional layer at the interface for high performance solid oxide
fuel cells, interaction of nanostructured metal overlayers with oxide - interactions between metals and oxides are key
factors to determine the performance of metal oxide heterojunctions particularly in nanotechnology where the miniaturization
of devices down to the nanoregime leads to an enormous increase in the density of interfaces, resolve a doi name - type or
paste a doi name into the text box click go your browser will take you to a web page url associated with that doi name send
questions or comments to doi, high throughput production of pristine graphene in an - the preparation of aqueous
graphene dispersions by exfoliation of pristine graphite in the presence of a wide range of surfactants is reported, staff
profile city university of hong kong - 2018 chairman the 10th asian conference on organic electronics a coe2018 city
university of hong kong hong kong 5 8 december 2018 organizing committee member theme 3 session chairman xiv
international conference on nanostructured materials nano2018 city university of hong kong hong kong 24 29 june 2018
2017, researchers academics ritsumeikan university graduate - name title research theme ameyama kei professor
development of materials for use in highly functional high performance structures ando taeko associate professor, the
journal of physical chemistry c acs publications - distinct binding of rhenium catalysts on nanostructured and single
crystalline tio 2 surfaces revealed by two dimensional sum frequency generation spectroscopy, journal of electrochemical
science and technology - it is distributed four times a year the first volume was published in september of 2010 publishes
high level communications research articles and mini reviews related to all field of electrochemical science and technology,
condensed matter authors titles new arxiv - four on lattice and six off lattice models for active matter are studied
numerically showing that in contact with a wall they display universal wetting transitions between three distinctive phases
